

Some Recent Projects

Science & Humanities was originally established as **Science & Health** in 1996 and since that time we have grown substantially.

We are working in around 30 Local Education Authority areas

In 2004 more than 4000 students took our courses

Education

Partnership of five Tyne & Wear LEAs - Shockwave - A three day dramatic emergency simulation for more than 120 students with associated CPD and resource pack

National Academy for Gifted and Talented Youth - a programme of outreach activities for G&T students delivered at centres around the country.

South Tyneside and Newcastle EiCs - Project Leonardo - a programme for all local schools, core days of activities for 100 students on Leonardo the artist, Leonardo the enigma, Leonardo the engineer and Leonardo the scientist and anatomist. Including web site development, teachers briefing, local media liaison, contact with students in Italy and possible visit to Florence.

North of Tyne Challenge Cup - Competitive activities over two days for teams of five students from fifteen schools. Activities include intellectual and physical challenges, an IT challenge and a general knowledge quiz.

Rochdale EiC - The Secret Formula - two day forensic science investigation at the Centre for Forensic science at University of Central Lancashire, including six experiments, police interviews and a body!

UNIVERSITY
OF CENTRAL
LANCASHIRE

Ten summer schools in 2004 - providing a range of bespoke programmes over up to eight days and a number of contributions of standard and adapted courses

Some Recent Projects

Oldham G&T cluster - Fun with Genes - Innovative nine day summer school with DNA workshops, experts in attendance telephone conferences with the creator of Dolly the sheep, an international clinical human geneticist and genetics counsellor, visits to interactive science centres, plus parents debate.

Hounslow EiC - Rainbow Island Disaster - an ecology disaster management game developed over two years and resulting in a days fun activity for students, teachers' CPD, videoed newscasts, student news bulletins, and a resource pack that is now in use in local schools.

Science Centres

Government of Sharjah, United Arab Emirates - Botanical Museum Discovery Centre within a new botanic garden. Development of over fifty interactive displays, writing text and image research.

ThinkTank - Millennium Point Birmingham, consultancy advice on all science areas - Medicine Matters, Medical Futures, Natural World, Things about me and The Street

Conkers - The National Forest Discovery Centre, development of scientific content and interactive displays

Sensation - Dundee's science centre - development of over sixty interactive displays about human and animal senses.

You are Amazing @ Bristol - Development of more than thirty interactive displays about the human mind and its relationship with the body.

The Children's Museum - Jordan - development of interactive displays

We have also developed education packs and videos for the Department of Health and the NHS, national charities and educational marketing companies.

We often develop courses with universities and research Institutes and as a result have gained a high reputation for accuracy and credibility.
